DERMAVEEN

Daily Nourish Revive & Protect Body Moisturiser SPF 50+

DermaVeen now has a skin barrier moisturiser with sun protection. An all over body moisturising cream, the Daily Nourish Revive & Protect Body Moisturiser SPF 50+, soothes and relieves extra dry skin with natural colloidal oatmeal and SPF50+ broad spectrum sun protection. Suitable for all skin types, this nourishing moisturiser replenishes the skin barrier and locks in moisture for smooth skin. Ideal for sensitive and dry skin, this moisturiser is also pH-balanced and free of common irritants - lanolin, artificial dyes, fragrances & alcohol.

KLEENMAID'S NEW TECHNOLOGY }

HELPING 1 IN 5 AUSTRALIANS

Allergy and immune diseases affect approximately one in five Australians, and they are increasing in prevalence.¹ It's therefore not surprising that there is a growing demand by Australian consumers for home appliances that help to remove allergens.

Kleenmaid are excited to announce their first washing machine launch in 10 years, the Eco Sensitive washing machine, specially designed with an Allergy Safe program.

The Eco Sensitive washing machine incorporates a number of features designed to assist people suffering from asthma and allergy. To remove dust mites, a significant irritant for asthmatics, clothes and bedding must be washed at greater than 55°C. The Kleenmaid Eco Sensitive Washing Machine washes at temperatures up to 90°C, ensuring that dust mites are eliminated. Its high spin speeds and ability to provide four rinse options, helps in the removal of residual detergent.

"We have spent several years developing this new washing machine to ensure it meets consumer needs with the latest innovation and technology" says Danny Hamilton, CEO of Kleenmaid. "Before launching this product, we

asked Australian Mums to test the product to ensure it met their needs and they rated it 4.8 stars out of 5".

As one mum said "My old top loader had the hot water plumbed into the machine, meaning I could only wash to around 50 degrees C. I have always hot washed all bedding and towels due to my son's severe allergies to dust mites. Having washed towels and bedding in the Kleenmaid Eco Sensitive machine he has commented on feeling better when waking in the morning, and being less reliant on his preventer medication. I have been washing the towels and bedding at 70 degrees C, and using the extra rinse cycles. It is great to think his need for medication has dropped"²

The Allergy Safe program provides the peace of mind that comes from knowing that seven allergens and four bacteria types can be controlled while the Eco Sensitive is washing gently and economically.

To top off what is already an impressive range of features and benefits, Kleenmaid will even let consumers try the Eco Sensitive washing machine for 14 days free of charge.³ If they are not delighted with the results they will pick it up, no questions asked.

The best you can own Eco Sensitive Washing Machine

For quality, performance, and value, Australians need look no further than the 32 year old trusted laundry brand, Kleenmaid.
